

DATA SHEET

opCHARTS FOR NMIS

Custom Interactive Dashboards

INTERACTIVE DASHBOARDS

Create custom dashboards, group them by role or function, and limit their availability based on user privileges.

NETWORK DIAGRAMS

Develop custom geographic, network, and topological maps; use these individually or include them in larger dashboards.

CUSTOM DATA VIEWS

Present the required performance, state and service data for your business critical services in a single view. Choose the data you need and how to present it with a few simple clicks. Present different types of data to different teams.

VISUAL ACTIONS

Quickly see TopN users, Degraded nodes, or drill down quickly based on criteria you select to create a custom view on-the-fly.

DETAILED GRAPHS

Enhanced views provide detailed graphs for every device parameter; use these charts as-is, or edit them to create more detailed views and add them to your dashboards.

DOWNLOAD NOW

From geographic to topological mapping, custom charts to personalized network diagrams, opCharts brings dynamic, interactive charting to NMIS data. Popular in enterprise environments and perfect as a NOC interface or customer portal, opCharts provides a Single Pane of Glass, including custom dashboards, maps, and charts combining multiple data sets.

Developed to display large amounts of data through a responsive, intuitive interface, opCharts provides NMIS users the ability to create modern, professional looking dashboards that deliver the "wow factor" users demand. Dashboard creation becomes dynamic, offering the ability to create custom displays quickly, with multiple levels of detail. Charts are inherently interactive, supporting time scaling and zoom levels through easy to use graphical environments.

Driven by customer demand and feedback, opCharts delivers the enterprise-level quality users expect at a price point managers love.

Minimum Requirements:

UNDER 250 NODES

UNDER 1000 NODES
