

# DATA SHEET

# opCONFIG FOR NMIS AND OAE

Configuration and Compliance Management

## MULTI VENDOR CAPABILITY

Collects and backs-up configuration information in all environments including multi-vendor.

## COMPARE CONFIGURATION DATA

Maintains a full history of configuration changes and audit results. Facilitates software version inventory reporting and provides ease of review for software version compliance. Allows configuration comparison between versions and across devices.

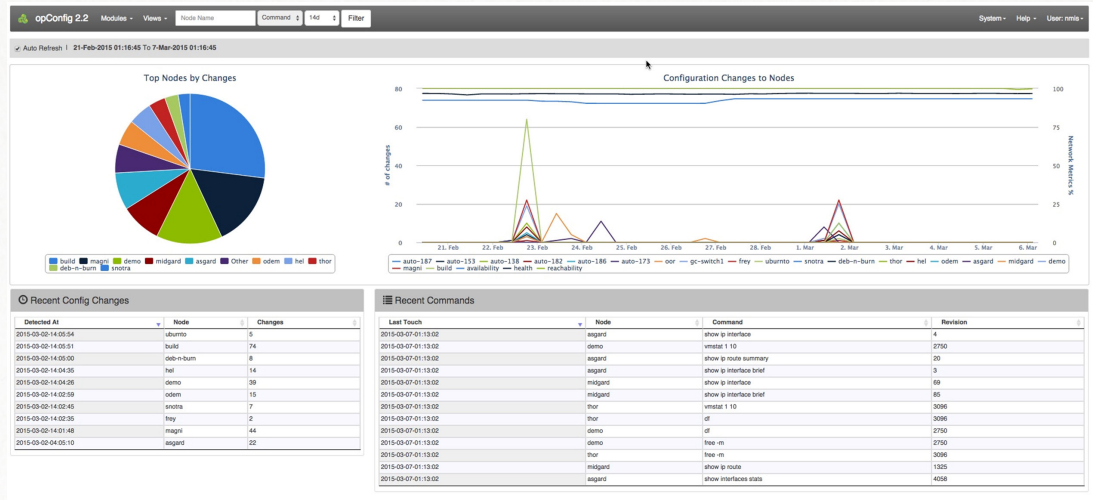

## COMPLIANCE POLICY ENGINE

The robust Compliance Policy engine ships with the Cisco-NSA rule set, but can be expanded to support PCI-DSS, HIPAA/HITECH, COBIT, and custom enterprise policies.

## NMIS DRILL DOWN

Allows drill down from NMIS device status and performance information into detailed configuration information.

**DOWNLOAD NOW**

Configuration and Compliance Management is now easier to implement than ever before with opConfig. opConfig continuously monitors the configuration of devices discovered by Open-Audit Enterprise or managed by NMIS, tracks changes and stores a complete history of configuration information. opConfig can leverage NMIS' business policy engine, opEvents, to provide instantaneous correlation and notification when device configurations change or stray from enterprise policies.

opConfig allows organizations to simplify the management of equipment configuration files in multi-vendor environments; assisting in disaster recovery, trouble shooting and change management. Organizations can easily manage the backup and comparison of configuration information, assisting in quick resolution of problems and compliance with standards.

### Minimum Requirements:

#### UNDER 250 NODES

|                       |
|-----------------------|
| Dual core processor   |
| 4Gb of RAM            |
| 20Gb HDD              |
| 64 bit Linux (CentOS) |
| Apache                |

#### UNDER 1000 NODES

|                       |
|-----------------------|
| Quad core processor   |
| 8Gb of RAM            |
| 80Gb HDD              |
| 64 bit Linux (CentOS) |
| Apache                |

A bundled VM with NMIS, opConfig and Open-Audit Enterprise (OAE) is available for download
