NETWORK MANAGEMENT AND IT AUDIT SOFTWARE

We will send you the recording.

Submit your questions anytime. We'll do Q&A throughout.

Please complete the Exit survey.

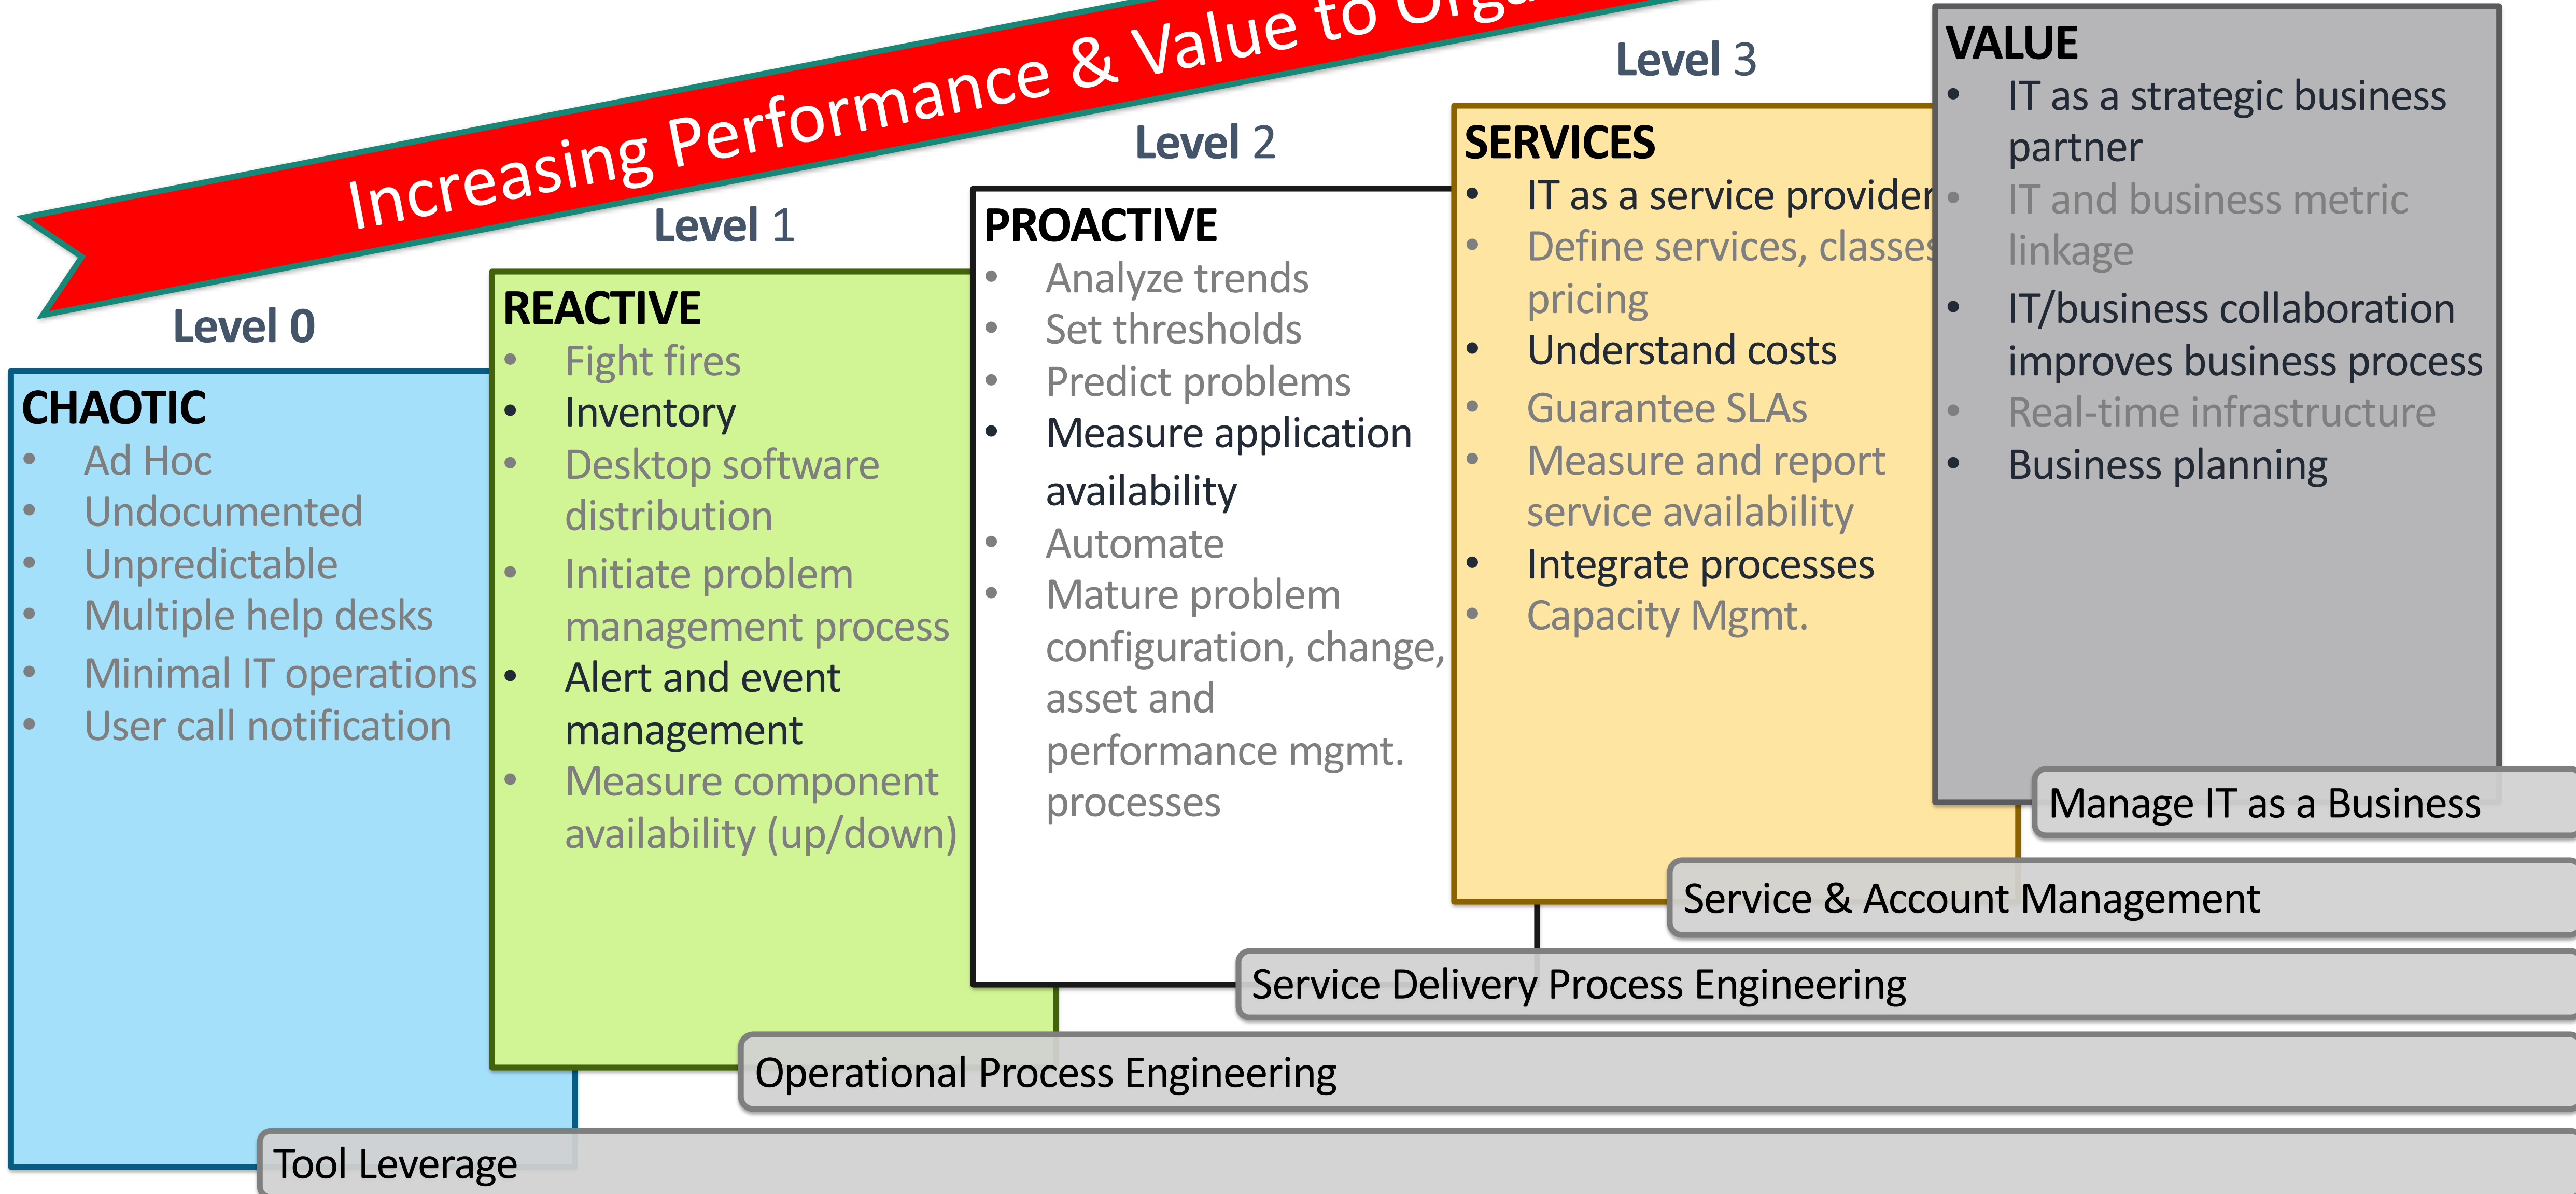

# Topics for Today

You see it every day, another large company was fined by a major software vendor for not complying with licensing requirements. Don't be that guy! Join us for this 45-minute session while we discover:

- How to leverage Open-Audit's software auditing system to provide License auditing and reporting
- How quickly create and manage new Licenses in Open-Audit
- Options for creating detailed live dashboards and scheduled reports to keep you abreast of License usage

# **SOFTWARE AUDITING WITH OPEN-AUDIT**

# Open-Audit

## Software Auditing

- WHY?
  - A contractual audit clause is part of most End User License Agreements (EULA)
  - In the US, liability for each willful infringement can be up to \$150,000
  - Tracking where your licenses are expended can help identify licenses that can be repurposed

# Open-Audit

## Software Auditing

- Audit scripts query installed software on all supported OS
  - Discover -> Audit Scripts -> List Audit Scripts
- How?
  - Completed as part of discovery
  - Can be run from OA login screen
  - Scripts can be deployed and run via cron job or Windows Task Scheduler
  - Scripts could be sneaker netted to air gapped machines, output files saved and manually uploaded (Manage -> Devices -> Import Devices from Audit Script Result)

# Open-Audit

## Software Auditing - Reporting

- Audits compare previous results to current and identifies new installed packages; reported in:
  - Dashboard – New Software Discovered per Day widget
  - New Software reports (left menu on Dashboard, also Report -> Discovery)
- All Software reported in Summary: Report -> Software -> Software
  - Hint: You can search horizontally across dB for installs using the Search field of Adv. Filter

# **MANAGING LICENSE USAGE IN OPEN-AUDIT**

# Open-Audit

## Manage Licensing

- Licenses are managed in the License Collection
- Manage -> Licenses -> List Licenses
- Process
  - Find a device you know has the software on it you want to track
  - Identify how the software is listed (name), then how you want to track (version #, depth?)
  - Create New entry in List Licenses
    - Accepts percent sign (%) as wild card character

# CREATING CUSTOM DASHBOARDS

# Open-Audit

## Custom Dashboards for Software

- Dashboards and Widgets can be customized in the Enterprise Edition
- Manage -> Dashboards -> List Dashboards
  - You can edit, but not delete, a shipping dashboard
- Manage -> Dashboards -> List Widgets
