EXECUTIVE SUMMARY

Aldeas Infantiles SOS, develops programs for children and families that are delivered in cooperation with governments, civil society and communities with an aim of guaranteeing the rights of children and adolescents to a loving family and community life.

The Uruguay head office had been using a well-known system configuration tool to audit and track changes occurring for a range of devices connected to their network. The IT team were finding the software to be quite complex and the supporting hardware and software required was expensive for a non-profit organization. Open-Audit Enterprise proved to be a cost effective, easy to use network auditing product that could intuitively collect and store the data that was relevant to the organization – saving the IT team significant time and effort.

Open-Audit Enterprise main dashboard

Compared to other products, Open-Audit Enterprise was very easy to set up. In less than an hour I had installed with minimal configuration.

ORGANIZATIONAL REQUIREMENTS

Aldeas Infantiles IT department are managing a growing office environment incorporating BYOD and a variety of Servers, Routers, Switches, Firewalls, Desktop PCs, Laptops, Printers and other personal devices.

They required a product that would cater for their current environment and would be able to scale and adapt to their future device audit needs including BYOD and IoT management.

THE AUTOMATED SOLUTION NEEDED TO TELL THEM:

- What devices are connected to their network;
- How the devices are configured;
- If there have been any configuration changes.

THE SOLUTION NEEDED TO BE:

- A low cost solution that would not rely on proprietary hardware, software or operating systems to run;
- Easy to implement;
- Low maintenance;
- Interactive and Intuitive with a GUI that would be simple to use.

THE SOLUTION

Aldeas Infantiles put Open-Audit Enterprise to the test against some other open-source tools and quickly found that the only complete and easy to manage solution was Open-Audit. The free 20-device enterprise license gave the organization a chance to test some of the advanced analysis, reporting and scheduling features and they quickly decided that the enterprise version would be the best solution for their business.

Open-Audit Enterprise allows me to have complete control of my network automatically and keep a history of the changes

THE RESULTS

The IT department now have a cost effective, easy to use IT Audit solution that tells them exactly what is connected to their network, how it is configured and when the configuration changes.

Compared to the previous system, the business has found Open-Audit Enterprise to be much easier to manage. "Open-Audit Enterprise is completely intuitive and you learn very quickly" commented Jose Ignacio, Aldeas Infantile's National Advisor for Information Technology and Communication. "It is very easy to use, offers a complete solution and requires very little administration".
